

Answering customer requests, Clarivate Analytics citation data now integrated into Altmetric Explorer for Institutions

Altmetric is the only alternative metrics provider to offer up-to-the minute citation counts from Web of Science

February 15, 2017, PHILADELPHIA – Clarivate Analytics Web of Science™ citation data is now integrated with the Altmetric Explorer for Institutions (EFI) platform, enabling users to compare the academic and broader impacts of a single research output at the click of a button.

Users who hold a current license to EFI and Web of Science Web Services Lite, Web of Science Web Services Expanded or InCites can now see the Web of Science citation

count and up to three citing articles in a new tab in Altmetric details pages accessed via EFI. The details pages provide a full record of all of the online attention Altmetric has tracked for a single research output.

Combined results screen

“Listening to our customers is at the heart of everything we do, and enabling the integration between Altmetric and Web of Science had become a regular request,” said Joelle Masciulli, Director, Content Management Strategy at Clarivate Analytics. “Web of Science is committed to finding innovative ways to improve methods of research evaluation, and by bringing these two complementary metrics together; institutions can perform comprehensive analysis of both short- and long-term influence and impact of published research. We intend to look for additional ways to collaborate and partner with Altmetric in future releases of Web of Science.”

Speaking on the development, Altmetric’s Founder Euan Adie commented, “Ensuring that academics get credit for all of their work and are able to demonstrate this to funders and other stakeholders is a key benefit of altmetrics. We’re really pleased to be working with Clarivate to provide researchers with further evidence of their academic impact.”

About Altmetric

Altmetric was founded in 2011 and has made it a mission to track and analyse the online activity around scholarly literature. It collates what people are saying about published research outputs in sources such as the mainstream media, policy documents, social networks, blogs and other scholarly and non-scholarly forums to provide a more robust picture of the influence and reach of scholarly work. Altmetric works with some of the biggest publishers, funders and institutions around the world to deliver this data in an accessible and reliable format.

About Clarivate Analytics

Clarivate™ Analytics accelerates the pace of innovation by providing trusted insights and analytics to customers around the world, enabling them to discover, protect and commercialize new ideas faster. Formerly the Intellectual Property and Science business of Thomson Reuters, we own and operate a collection of leading subscription-based businesses focused on scientific and academic research, patent

analytics and regulatory standards, pharmaceutical and biotech intelligence, trademark protection, domain brand protection and intellectual property management. Clarivate™ Analytics is now an independent company with over 4,000 employees, operating in more than 100 countries and owns well-known brands that include Web of Science™, Cortellis™, Thomson Innovation™, Derwent World Patents Index™, CompuMark™, MarkMonitor® and Techstreet™, among others.
